## PROFESSIONAL PHILOSOPHY

I began my PhD in development and ended in environmental and natural resources. Throughout, I studied market and government failure using institutional and experimental methods. Since I finished my PhD, I have spent most of my time communicating economics to the public — blogging at [aguanomics.com](http://aguanomics.com), giving public talks and meetings with policymakers. I am now writing a professional trade book (*The End of Abundance: A Primer on Water Economics*, UC Press). I spend about half my time on teaching and applying economics, the rest on research and writing.
